

# Resume

**Wayne Zhou (周鸿清)**

*Software Engineer | Shanghai, China*

 Email address: z.h.qing.t@gmail.com

 Phone number: +8618259441017

Wechat: wayne\_liberty

## Professional Summary:

Dedicated software engineer with over 6 years of hands-on experience in the software industry. Specializing in front-end development, with a proven track record of delivering high-quality solutions for complex single-page web applications. Skilled in crafting well-designed technical solutions to meet business objectives. Have experience with current trending AI tools like cursor, Eliza, OpenAI api and LangChain.

---

## Work experience

### Front-End Developer

**RingCentral** (May 2019 - May 2022)

**CloudKitchens** (May 2022 - December 2023)

**Cyber** (May 2024 - May 2025)

### Responsibilities and Achievements:

Ringcentral

- Contributed to a large-scale development team of over 100 members in building an MVP app with messaging, video, and phone capabilities. Involved in the project from its early stages, gaining valuable insights into large-scale project evolution and the importance of teamwork.
- Spearheaded the implementation of the initial version of the icon system and addressed legacy UI performance issues, significantly enhancing user experience.
- Pioneered the development of a video app prototype from scratch, assuming a mentoring role for new team members.
- Developed a detached window solution to render specific parts of the UI in a separate window, improving the application's user experience and leveraging webpack's module federation functionality.
- Co-designed and implemented a virtual list component crucial to project optimization.
- Upgraded project tooling, including migrating from Webpack version 4 to 5 and transitioning from npm to yarn, resulting in a 3x improvement in installation process time.

#### Cloudkitchens

- Identified the need for a comprehensive remote logging system and took the initiative to develop and integrate it into the application.
- Implemented local caching to enhance First Contentful Paint (FCP) and reduce page load time by 20%.
- Adapted quickly to Android development requirements and successfully delivered the Android version of the application within the designated timeline.

#### Cyber

Cyber is a web3 startup, during my period in this company I adapt quickly to different business needs and learn relative technology, research and deliver what the company needs. Including web3 wallet, sql, ai tech, python etc.

- Use latest technology like nextjs to build websites, e.x. <https://socialsummer.xyz/>
- Use react native to build a passkey wallet.
- Use AI technology to analyse twitter data and predict market sentiment

---

## Skills

### Technology

#### Web Development

Proficient in JavaScript, TypeScript, HTML, and CSS, with over 6 years of experience. Specialized in the React ecosystem for front-end development, adept at building complex single-page web applications. With experience of the latest technology stack like nextjs, tailwind etc.

#### AI Experience

During my last job I actively experienced with AI tools like cursor, copilot to improve my productivity. And also experiment on ai capabilities in our product like LLM, text to image etc. I'm familiar with the current popular AI frameworks like Eliza, OpenAI api, LangChain etc.

---

## Languages

- **Mandarin Chinese:** Native speaker.
- **English:** Proficient speaker.

---

## Education

### **Bachelor's Degree in Software Engineering**

*Xiamen University*

*Graduated in 2019*
